

## Site Preparation, Farm Land Mechanical

Description: This treatment involves the crushing or mowing of unwanted competition on abandoned farm land prior to planting. Generally, this treatment is followed up with a secondary chemical application prior to the actual planting.

Assistance Rate: \$254-288/ hectare (2007).

Land Owner Cost: Varies depending on the condition of the site and the equipment necessary to effectively treat it; will range from \$40-100/ha (2007).

## **Site Preparation, Farm Land**

### **Chemical**

Description: This treatment involves the chemical preparation of abandoned farm land sites prior to planting. It can involve simply grass sites or sites that have been previously mowed / bush hogged.

Assistance Rate: \$334/ hectare (2007).

Land Owner Cost Varies depending on the condition of the site and the equipment necessary to effectively treat it; will range from \$10 -30/ha. This treatment can also be performed aerially at a similar net cost to the owner (2007).
