

Pre-Commercial Thinning

Description: This treatment involves the spacing of young, naturally regenerated softwood, mixed wood or hardwood stands that are excessively dense. Better quality stems and preferred species are left in a free to grow condition.

Assistance Rate: \$720/ hectare (2010). (\$750/ha contractor rate - includes mandatory minimum owner contribution of \$30/ha)

Land Owner Cost Varies depending on contractor; minimum \$30/ha
